

Community Profiles

Puget Sound Regional Council

June 2022

Community Profiles

- Built from Census Data Profiles (DP) for all places in the Puget Sound Region
 - Data Profiles have the most frequently requested social, economic, housing, and demographic data. Four subject areas are in separate data profiles. The Data Profiles summarize the data for a single geographic area, both numbers and percent, to cover the most basic data on all topics.
- Uses ACS 5-yr data to allow information for small and large cities as well as Census Tracts
 - The tool allows the selection of two non-overlapping Census Years so data can be compared
- App was built using a combination of Python and R to download, process and visualize the data. The web app is built using Shiny
 - If you know R and want to start a site of your own using the code, feel free to fork the code at <https://github.com/psrc/community-profiles>

Try the app yourself (maybe after the webinar!):

Community Profiles

As a State Data Center for the central Puget Sound region, PSRC keeps a complete inventory of data released from the U.S. Census Bureau. Cities and counties use it to track the well-being of children, families, and the elderly as well as to determine where to locate new public facilities. This portal includes demographic profiles on a variety of topics for all cities and towns in the PSRC region.

The data on this dashboard is a snapshot of the information that is available from the US Census Bureau. In order to view data for all the cities and towns in the Puget Sound region, we are limited to using American Community Survey (ACS) 5 year data. For this reason, you will only find two non-overlapping sets of data on this dashboard. By only including non-overlapping data, users can analyze the data for changing trends. The data on this dashboard is divided into five categories:

- People Measures
- Household & Housing Measures
- Job & Income Measures
- Transportation Measures
- Transportation Projects

Click on the icon at the top of the page that corresponds to the metrics that you are interested in and you will get access to those measures. If you have any questions about the data or are curious what else we might have, please click [here](#) and we will be happy to help.
